Presentation Description: Resources for a Student-Centered Approach to Teaching Intermediate Algebra

During the Spring 2016 Semester, Pam Frost was granted a sabbatical leave to primarily review and develop materials that would support the common learning outcomes of intermediate algebra as well as coordinate with the Common Core State Standards for Mathematics in K-12 and comparable intermediate algebra courses at the Connecticut state universities. A summary of Pam's work and resources can be found on the MATYCONN website. During this presentation Pam will be providing an overview of these resources and giving attendees the opportunity to experience some of the resources first hand. Some of the resources are also applicable to elementary algebra.
